

Amendment to the Claims:

Please cancel claims 3, 4, 6 and 7, and 13, amend claims , 1, 2, 8, 11, 12, 14-17, 19 and 20 and add claims 21 - 26.

1. (Currently amended) A digital broadcasting system, comprising:
a transmitting means having a means for producing data broadcasts, a first transmitting system ~~unit~~ for generating a digital broadcast, the digital broadcast including a digital audio/video broadcast and a data broadcast, a second transmitting system for constructing the digital broadcast received from the first transmitting system and a data broadcast provided by the means for producing a data broadcast and a unit for registering both the constructed digital audio/video broadcast ~~or~~ and the constructed data broadcast on an ~~a certain~~ Internet site; and
~~an Internet terminal connecting to the Internet site to receive the digital audio/video broadcast or the data broadcast.~~

2. (Currently amended) The digital broadcasting system according to claim 1, wherein the data broadcast is produced based on a Markup ~~markup~~ or JAVA® programming language.

3. (Canceled)

4. (Canceled)

5. (Previously presented) The digital broadcasting system according to claim 1, wherein the Internet site stores the digital broadcast or the data broadcast continuously produced.

6. (Canceled)

7. (Canceled)

8. (Currently amended) A method for operating a digital broadcast at a transmitting unit of a digital broadcast system, the method comprising:

producing a data broadcast;

generating the digital broadcast by using the data broadcast and a digital audio/visual broadcast; and

registering both the ~~produced~~ data broadcast, ~~or~~ and the ~~generated~~ digital audio/visual broadcast on an ~~a certain~~ Internet site,

~~wherein the produced data broadcast or the generated digital audio/visual broadcast is provided depending on a viewer's request.~~

9. (Previously presented) The method according to claim 8, wherein the Internet site provides a viewer with a dedicated browser.

10. (Previously presented) The method according to claim 8, wherein the Internet site stores the digital audio/video broadcast or the data broadcast continuously produced.

11. (Currently amended) The method according to claim 8, further comprising converting the generated digital audio/visual broadcast and the produced data broadcast into an Internet-supporting format, if the generated digital audio/visual broadcast and the produced data broadcast are not in the Internet-supporting format.

12. (Currently amended) A method for operating a digital broadcast at an Internet terminal of a digital broadcasting system, the method comprising ~~the steps of:~~
connecting to an Internet site providing both a data broadcast and a digital broadcast, ~~the digital broadcast~~ including a digital audio/video broadcast and a data broadcast;

selecting ~~the~~ a broadcast from the data broadcast or the digital broadcast or both
~~that is intended to be viewed~~; and

downloading and displaying the selected broadcast.

13. (Canceled)

14. (Currently amended) The method according to claim 12, wherein one of ~~the~~
a dedicated browser provided from the Internet site or a browser embedded in the Internet terminal is used to connect to the Internet site.

15. (Currently amended) The method according to claim 12, wherein the
provided data broadcast includes ~~in case that a linked Internet site exists among the~~
~~selected broadcasts, a viewer moves to the linked Internet site depending on his/her~~
~~request.~~

16. (Currently amended) The method according to claim 12, wherein both the
digital ~~audio/visual~~ broadcast and the data broadcast are selected.

17. (Currently amended) A method for operating a digital broadcasting system,
the method comprising the steps of:

registering a at least one digital audio/visual broadcast ~~or a~~ and at least one data
broadcast on an ~~a certain~~ Internet site;

connecting to the Internet site to select a ~~the~~ broadcast from the at least one
digital audio/visual broadcast and the at least one data broadcast ~~that is intended to be~~
~~viewed~~; and

downloading and displaying the selected broadcast.

18. (Previously canceled)

19. (Currently amended) The method according to claim 17, wherein the Internet site has a plurality of digital audio/visual broadcasts or data broadcasts continuously stored.

20. (Currently amended) The method according to claim 17, wherein the at least one data broadcast has a linked Internet site.

21. (New) The digital broadcasting system according to claim 1 further comprising an Internet terminal for connecting to the Internet site to receive the digital audio/video broadcast or the data broadcast.

22. (New) The digital broadcasting system according to claim 21, wherein the Internet terminal connects to the internet site via a browser.

23. (New) The digital broadcasting system according to claim 22, wherein the browser is a browser embedded in the Internet terminal or a browser provided from the Internet site.

24. (New) The digital broadcasting system according to claim 21, wherein the Internet terminal is a PDA, a mobile terminal, a computer or a home electric appliance with an Internet function.

25. (New) The method according to claim 8, wherein the data broadcast or the digital audio/visual broadcast is provided upon a viewer's request.

26. (New) The method according to claim 14, further comprising downloading and installing the dedicated browser, if the dedicated browser exists in the Internet site.
